

# RUNWAY VECTOR OnOff

"When designing Runway, we took a holistic approach, starting from the effect of lighting by creating a family of both linear lighting creating general light and spotlights creating accent lighting. Tying it all together with the golden proportions, curvatures and connectivity. Design worthy the attention of a fashion runway."

Runway Vector is where design minimalism meets excellent performance. Created to deliver sustainable lighting in larger spaces like retail stores, industrial settings, warehouses and open-plan interiors.

Compact in form, strong in presence, and powerful in performance —light refined to perfection, achieving more with less.

Track mounted with 3-circuit universal adapter.
